

Holy Stone MANUFACTURERS OF Ceramic Capacitors

World Class – World Wide

Holy Stone – who we are

Holy Stone is a world class manufacturer of application-specific ceramic capacitors.

Founded in 1981 as a distributor of electronic components, the Holy Stone Enterprise Company expanded into the manufacture of multilayer ceramic capacitors in 1994 and soon established itself as an industry-leader in application-specific ceramic components.

Based in Taipei in Taiwan, the company prides itself on its state-of-the-art manufacturing facilities, which produce top-quality products at competitive prices. Its capacitors are manufactured from a 40,000 square-metre factory in Lungtan, Taiwan, as well as additional facilities in Dongguan and Wujiang in China.

Holy Stone also places great emphasis on the technical knowledge of its team, with its global infrastructure of distributors and representatives assembled from industry experts capable of providing an exceptional standard of technical and commercial support. In addition, its advanced materials research laboratory, located in Japan, ensures Holy Stone remains at the cutting-edge of ceramic capacitor technology.

Holy Stone also holds all major international approvals, including ISO9001-2000, ISO14001 and QS9000, as well as recognised approvals for its surge and safety capacitors. All its products are fully RoHS compliant.

As a result of this commitment to quality and customer service, Holy Stone has experienced phenomenal growth – it is currently a \$410 million publicly-listed business in Taiwan and maintains a high profile on the Taiwanese Stock Exchange, ranking among the top 100 companies.

Sales and support network

In 2007, Holy Stone extended its operation with the formation of a new company to serve the sales and technical needs of the European market. Called HolyStone (Europe) Limited, the company is based in Norfolk, UK, and serves as the European headquarters for its parent company.

Stretching across the whole of Europe, HolyStone (Europe) Limited has built a network of representatives and distributors throughout its territory to ensure each country is fully serviced, and continues to grow its coverage across Europe.

Its US counterpart, Holy Stone International, based in California, looks after the North American market, whilst the Holy Stone Enterprise Company services the Asian market, with offices in Kaohsiung in Taiwan, Dongguan in Hong Kong and Shanghai in China.

Some key technologies

Holy Stone's offering includes two key technologies:

1. SuperTerm series capacitors incorporate a 'flexible' polymer layer in the termination structure, which effectively absorbs mechanical stress and greatly reduces the incidence of cracking and improves long-term product reliability.

2. Arc prevention coating is an innovative process developed by the company, which coats the surface of the dielectric without encroaching onto the termination material. This creates a non-porous surface that keeps moisture and dirt out, thereby preventing any reduction in surface resistance and arcing voltage of the capacitor.

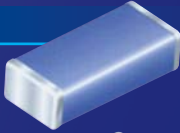

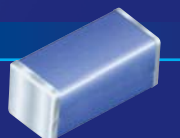

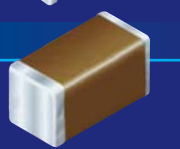

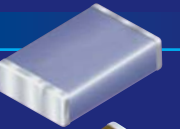

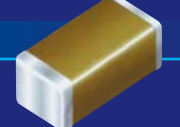

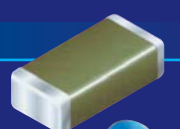

...and what we do

The Holy Stone product range and its possible applications are listed below.

For further details of voltages, capacitance ranges, specifications and test conditions, please see the Holy Stone catalogue or visit the website – www.holystonecaps.com

HVC Series		
High voltage capacitors ideal for power circuits, such as back-light invertors and DC to DC converters	Rated voltages up to 5KVDC	
SCC Series		
Safety capacitors for protection circuits, certified UL, EN132400	Class Y2/X1 and Y3/X2	
NCC Series		
Normal chip capacitors for decoupling circuits	6.3V to 50V sizes up to 1206	
HCC Series		
High capacitance MLCC for smoothing and decoupling circuits	Capacitance up to 100uF	
HCN Series		
High capacitance NPO/COG for ADSL/XDSL	Replacement for film capacitors	
HXC Series		
High capacitance X7R for input/output filters	50V and 100V capacitance up to 10uF	
SMPS Stacked Chips		
Available in sizes 1210, 1812, 1825, 2220 and 2225, from 25Vdc to 500Vdc	Capacitance values up to 33uF, High CV and low ESR	
HBC Series		
Stable ESR for high-frequency lighting ballast	Rated voltages 500 and 630VDC	
SDC Series		
Safety ceramic disc capacitors, certified UL, CSA, EN132400	Class Y2/X1 and Y1/X1	
LCC Large Chip Series		
Chip size up to 7565 for surge protection, isolation and power supplies	Rated voltages up to 8KV	
FSC Stacked Chips		
A range of large size stacked chips available in NPO, X7R and BX dielectrics. Voltage ratings from 50V to 500V	Capacitance values up to 9.0uF, in NPO and 600uF in X7R
